THE following Table exhibits at one View, the intrinsic Value *per Cent.* of the public Funds, and the Proportion they bear to each other, by which any Person may know which it will be most advantageous to purchase, and what Proportion such Purchase bears to the Value of landed Estates, and Life Annuities.

Explanation of the Table.

In the News Papers of *July* Twenty-seventh 1761, I find that 3 *per Cent.* Annuities, are at 82½, and *India* Stock at 141.

Query, Which of these will bring me in most Interest for Money, and what Interest will each of them produce?

To know this look in the first Column containing 3 *per Cents* for 82 ½, and then in Column 9, by which you will find that 3 *per Cents* at 82½ produce 3 *l.* 12 *s.* 8 *d. per Annum.* Then look in Column 7 for *India* Stock, and you will find 165, which shews, that when 3 *per Cents* are at 82 ½, *India* Stock is worth 165, in a due Proportion, bringing in the same Annual Interest of 3 *l.* 12 *s.* 8 *d.* So that by the Price in the Papers, *viz.* 141, it appears that *India* Stock is 24 *per Cent.* cheaper than 3 *per Cents* at 82½. This Rule so obviously gives the just Value of all the intermediate Funds, that it requires no further Explanation.

N. B. After having made a just Estimate of the Value of each of the Funds, you are at Liberty, if you think proper, to refer to the Remarks contained in *Every Man his own Broker*, concerning the Differences of the several Securities, from which this Account of the Stocks, and Method of raising the Supplies, are extracted.
